SKNode Coordinate System

// Initialize a sprite node

```
SKSpriteNode *myNode = [[SKSpriteNode alloc] initWithImageNamed:@"myImage"];
```

// Set the node's position

```
myNode.position = CGPointMake(x, y);
```

// This action moves the sprite to some position over time

```
SKAction *move = [SKAction moveTo:position duration:duration];
```

// This action removes the node from its parent

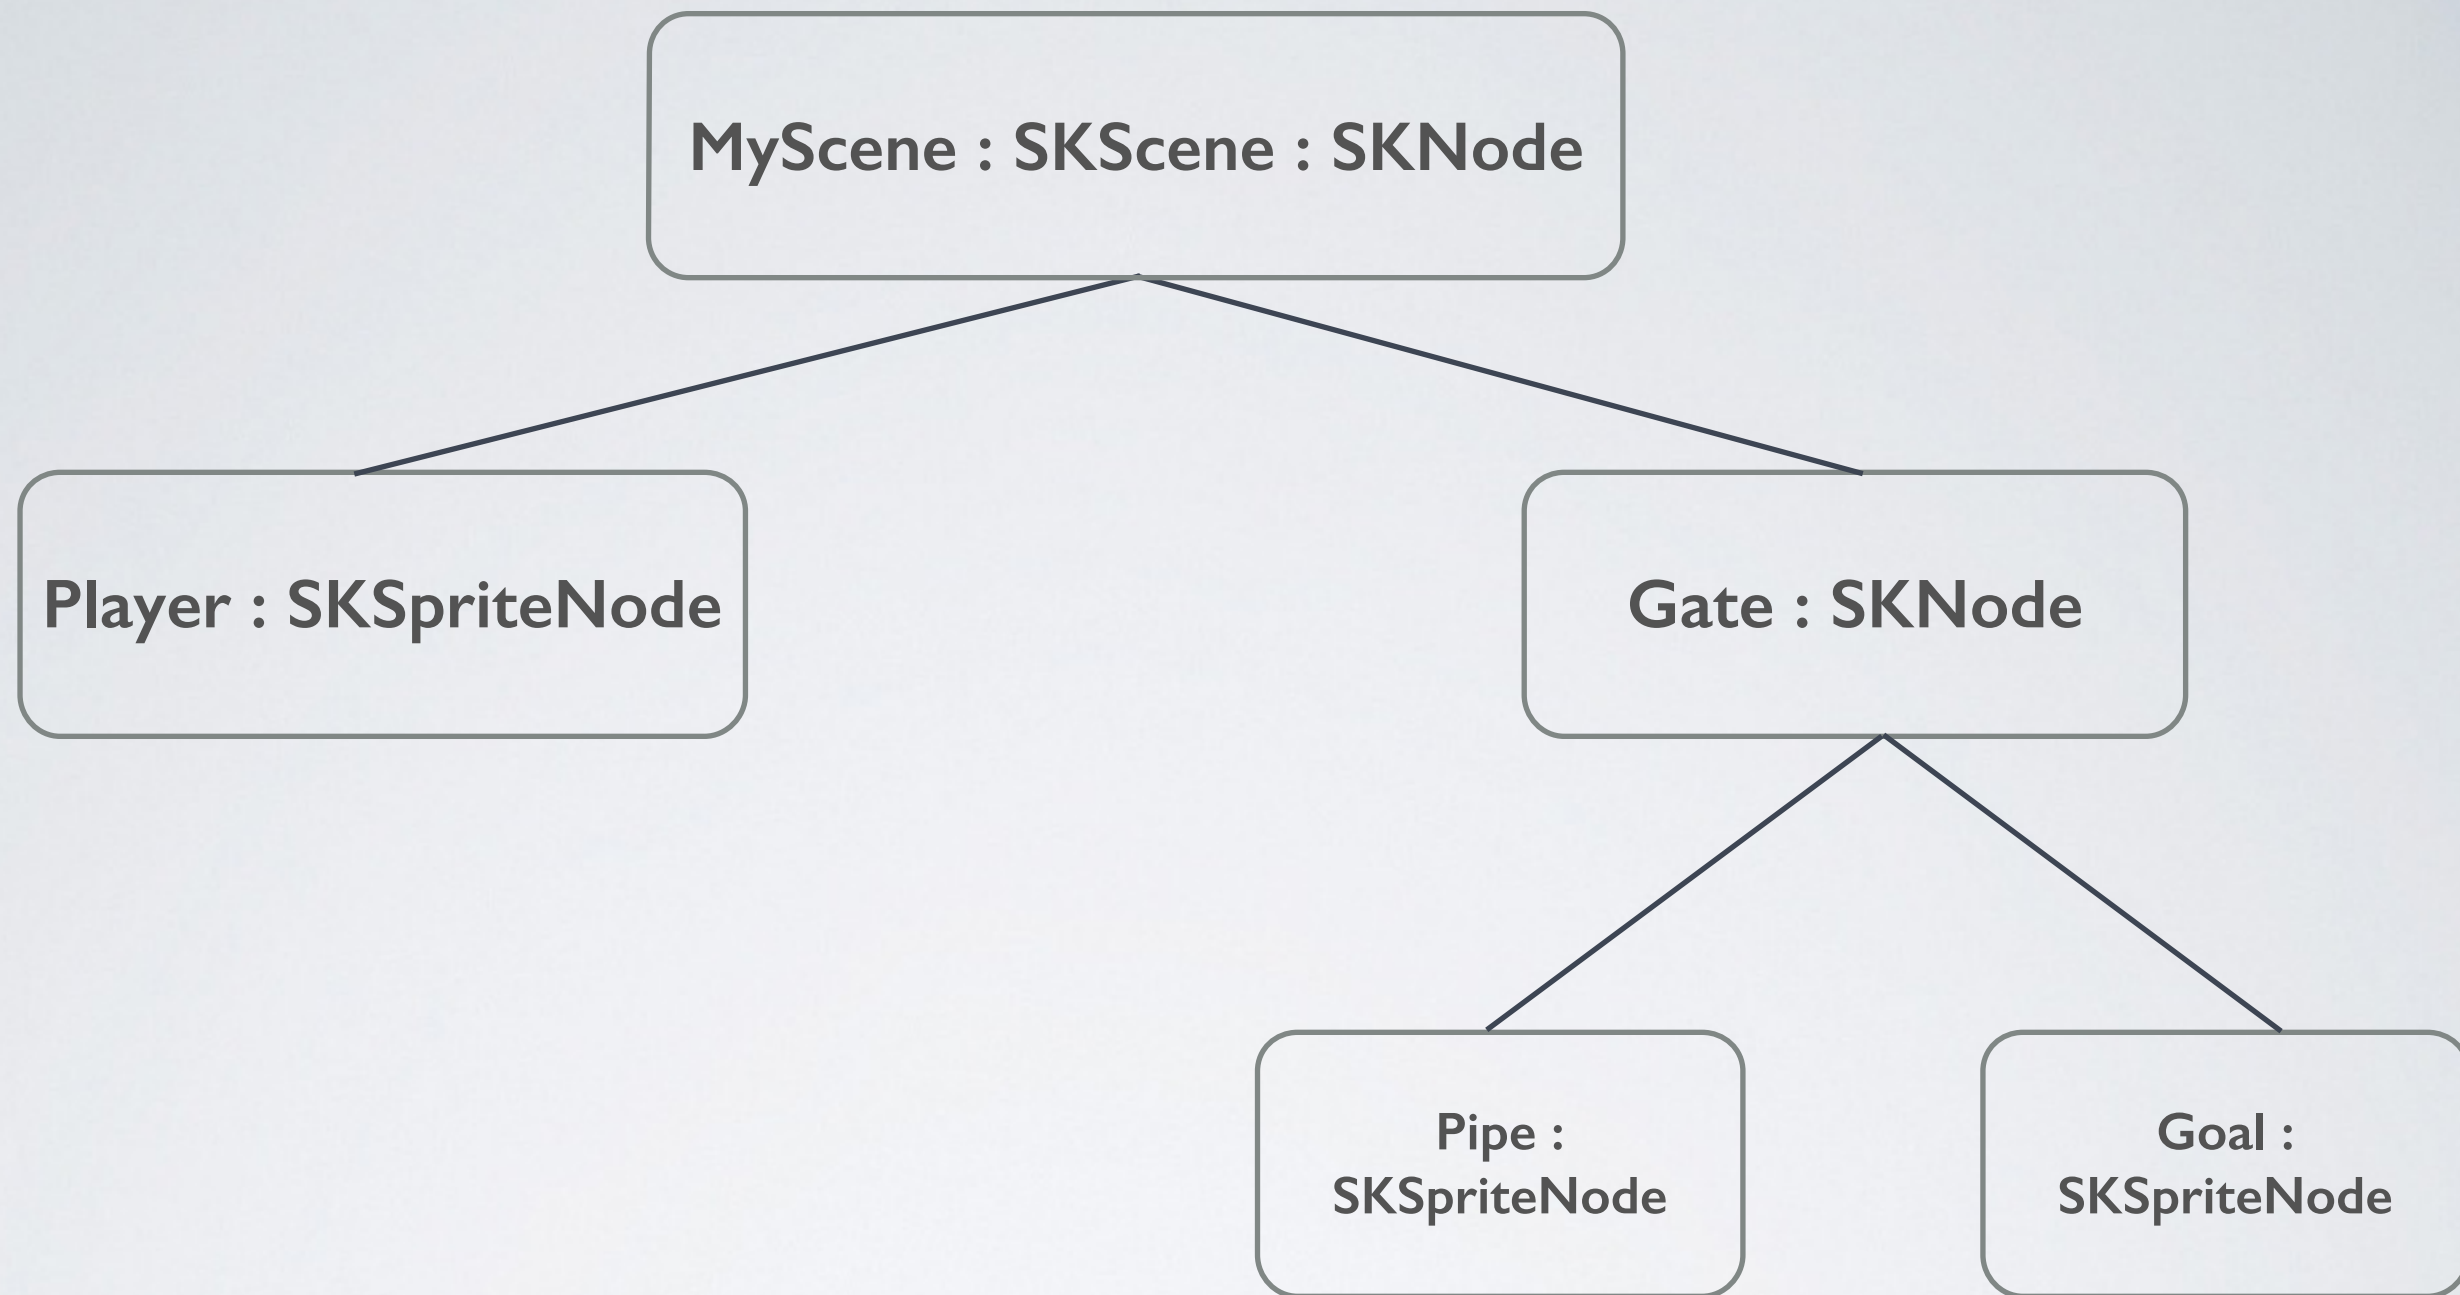

```
SKAction *removeFromParent = [SKAction removeFromParent];
```

// Run both actions serially by creating a sequence

```
[myNode runAction:[SKAction sequence:@[move, removeFromParent]]];
```
